

SGIP Approved CA Suppliers

An additional incentive of 20 percent will be provided for the installation of eligible distributed generation or Advanced Energy Storage technologies from a California Supplier. "California supplier" as used in this subdivision means any sole proprietorship, partnership, joint venture, corporation, or other business entity that manufactures eligible distributed generation resources in California and that meets either of the following criteria:

- A. The owner's policymaking officers are domiciled in California and the permanent principal office, or place of business from which the supplier's trade is directed or managed, is located in California.

Or

- B. A business or corporation, including those owned by, or under common control of, a corporation, that meets all of the above criteria continuously during the five years prior to providing eligible distributed generation technologies to an SGIP recipient
 - a. Owns and operates a manufacturing facility located in California that builds or manufactures eligible distributed generation resources.
 - b. Is licensed by the state to conduct business within the state.
 - c. Employs California residents for work within the state.

For purpose of qualifying as California Supplier, a distribution sales management office or facility does not qualify as a manufacturer.
