

# SGIP Approved Performance Data Providers (PDPs)

As of April 2, 2025

System owners participating in the Self Generation Incentive Program (SGIP) with projects larger than 30 kW are required to install performance meters to determine the net energy generated by their generation equipment or AES energy discharged by their storage equipment. In addition, combined heat and power (CHP) projects or electric-only fuels operating on non-renewable fuels are required to monitor fuel consumption. CHP projects operating on non-renewable fuels are additionally required to monitor useful thermal output. Data from the electric generation meters will be used to calculate the annual incentive payment under the SGIP Performance Based Incentive (PBI) program.

This data may be read and communicated to the Program Administrator (PA) by a third-party Performance Data Provider (PDP). All system owners of SGIP projects (under the Performance Based Incentive (PBI) program requirements) may choose to either apply for PDP status or contract with an approved PDP to submit performance data complying with the applicable minimum standards as defined in the SGIP Program Handbook.

Currently, these are the eligible Performance Data Providers for the SGIP:

## Approved PDPs

Company	Address	Phone	Contact	Email	Type of Data Service
Advanced Microgrid Solutions (AMS)	25 Stillman St., Ste. 200, San Francisco, CA 94107	414-638-6146	Manal Yamout	<a href="mailto:manaly@advmicrogrid.com">manaly@advmicrogrid.com</a>	<ul style="list-style-type: none"> <li>Energy Storage</li> <li>Electrical Metering</li> <li>Electrical Generation</li> </ul>
